Hemingway's

Fly Fishing Products

A scenic river with rapids and a fallen log. The river flows from the top left towards the bottom right. In the middle of the river, there is a large, dark, fallen log that creates a small waterfall or rapid. The water is white and foamy as it flows over the rocks and the log. The banks are rocky and covered with some sparse vegetation. The background shows a dense forest of tall trees.

Hemingway's

Fly Fishing Products

Dear customers,

Without intending to be a judge and give advice, we want only to introduce you to our approach to Fly Fishing and Fly Tying. We are true and pure nature lovers. We grew on the river banks and become tight bound to them. Fishing is just a logical consequence of time spent on the river and observations of life in it. After more than twenty five years in Fly fishing we have decided to found our company and tried to introduce our experience through our products. Hemingway's Fly Fishing Products was born. That is at least what we can offer. Fly fishing is now part of our business, but, in our souls and hearts, this is our life and passion ... indeed

*Fly fishing is not only our business...
...it is our passion and life.*

テンカラ

VALSESIANA

"M" - Medium - 8:2 means 8 bottom parts are stiffer and 2 tip sections more flexible. Rods are the stiffest and fastest or are pursuing larger fish and want the rod to help them land the big fish, up to 4 kg and bigger.

The rod action should be chosen based on the angler's favorite for a softer (Ultra Light - 5:5) or slightly stiffer (6:4 or 7:3) or the stiffest (Medium - 8:2) rod.

Specifications:

Extended length: 11 / 3.3 m

7 Telescopic Sections

Folded length: 1.9ft / 57cm

Cork Handle length: 10in / 25cm

Max Diameter: 14

Tip Diameter: 0.8mm.

8:2 Medium Action

Rod End Protector.

Screw Butt Cap.

Soft Cotton Rod Bag.

Will be available in lengths:

3.3m, 3.6m, 3.9m, 4.2m

Rod Has Exclusively High Performance Very Flexible And Very Strong.

Rod Is Balanced To Gain The Most Lifting Power.

Rod is designed to use without a reel.

Last section has strong braid lilian string connected to the tip or english connector for quick line change.

Tenkara Rods

Standard edition

Πευ

'ML' - Medium Light - 7:3 Rods are stiffer, have more precise and more powerful when casting, it is great for a larger fish up to 3kg, and even bigger with some experience.

Specifications:

Extended length: 11ft / 3.3 m

7 Telescopic Sections

Folded length: 1.9ft / 57cm

Cork Handle length: 10in / 25cm

Tip Diameter: 0.8mm.

Max Diameter: 14mm.

7:3 Medium Light Action

Rod Plug Protector.

Screw Butt Cap.

Soft Cotton Rod Bag.

Will be available in lengths:

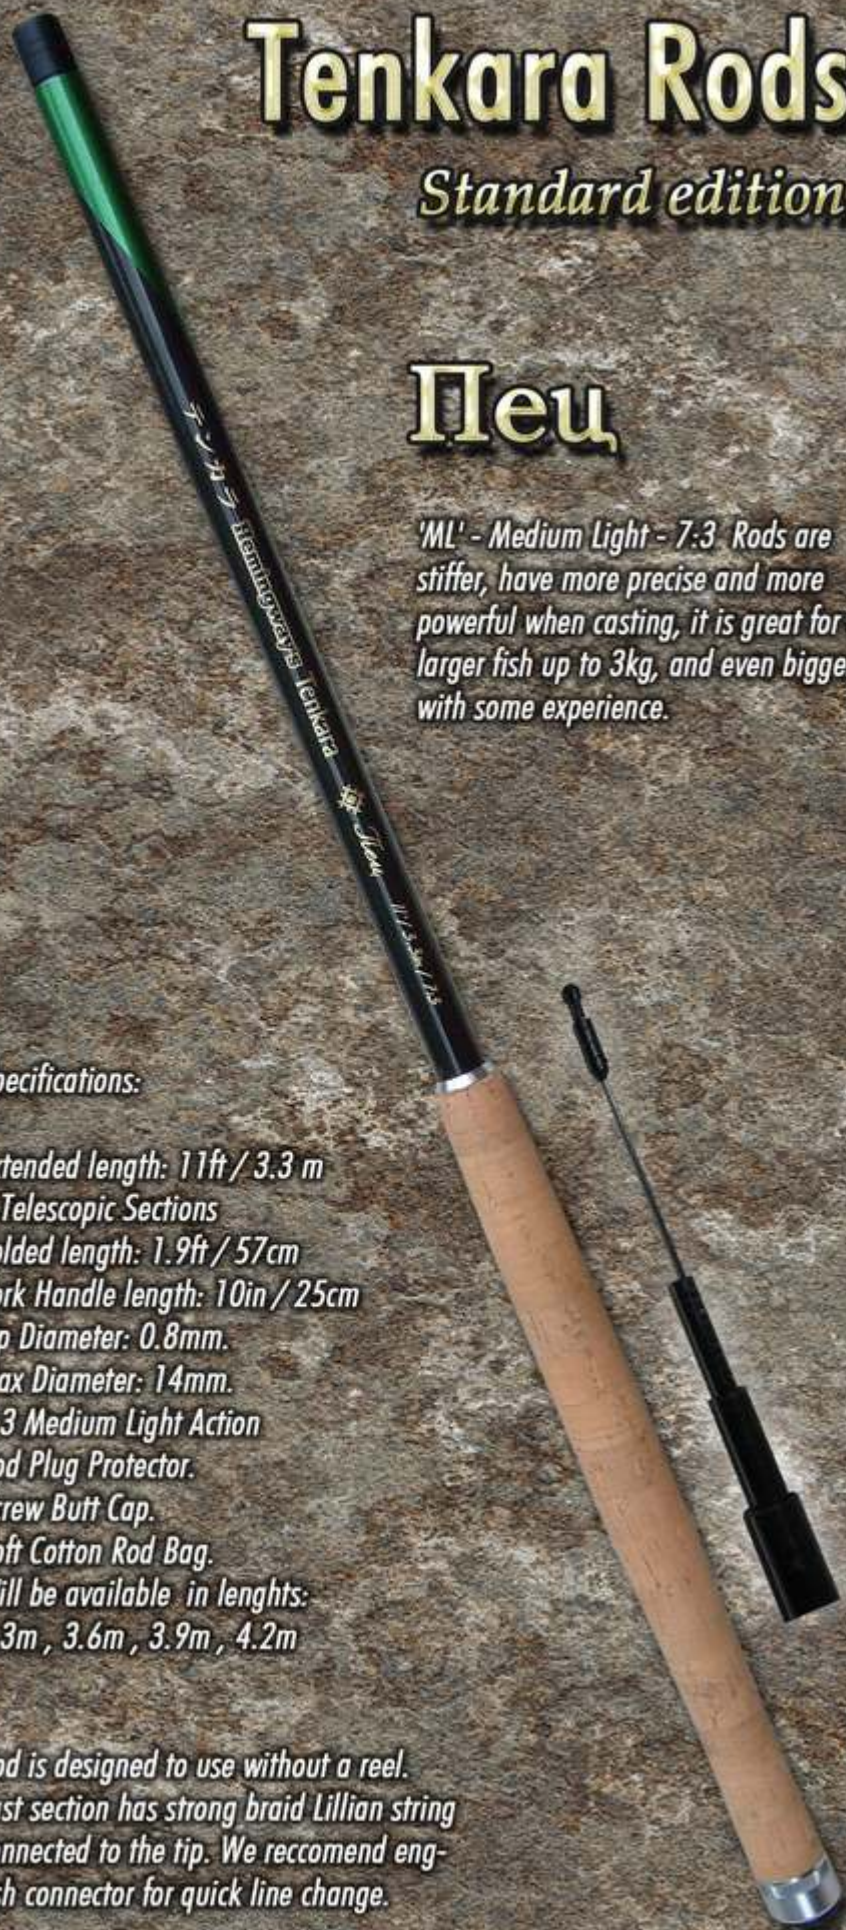

3.3m, 3.6m, 3.9m, 4.2m

Rod is designed to use without a reel.

Last section has strong braid Lillian string connected to the tip. We recommend english connector for quick line change.

Line weight - 3-6 wt / Length 12 ft / Tippet 6X

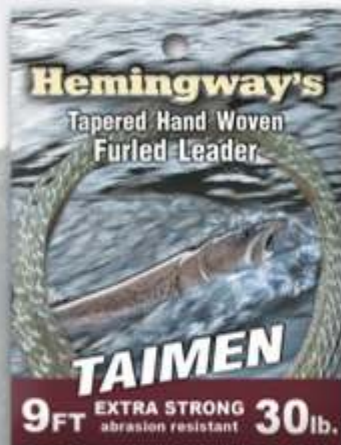

Art. HMG-FL-Sa

SALMON

A special design with long heavy butt section and supple front taper for better turn over.

Material: Low visible premium quality nylon

Line weight: 9-12 wt / Length: 10 ft / Tippet 0X

Art. HMG-FL-Ta

TAIMEN

Extra strong, abrasion resistance leader for Big Game fishing.

Material: premium quality nylon

Line weight: 9 - 12 wt / Length: 9 ft / Tippet 30lb

Art. HMG-FL-P/M

PIKE / MUSKY

Extra strong, abrasion resistance leader with kevlar tip section for toothy fish bite guard.

Material: premium quality nylon, Kevlar

Line weight: 9-12wt / Length: 7 ft/Tippet 30 lb.

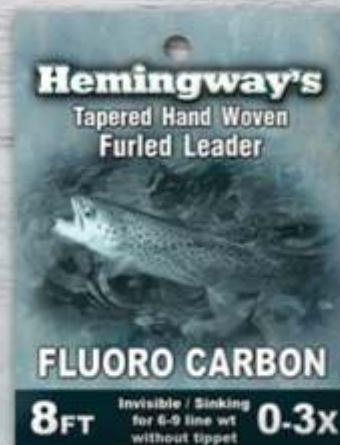

Art. HMG-FL-K

KEVLAR LEADER

Made from 100% Kevlar coated for better abrasion resistance. Prelooped with 2 shorb loops

Extreme durability without stretching

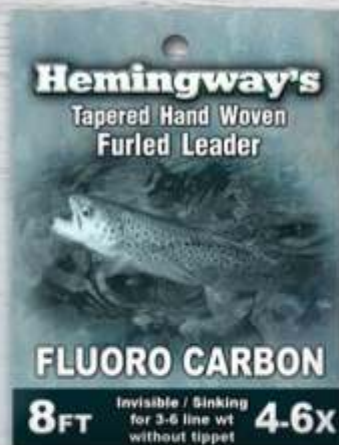

Line weight: 4-7 wt / Length: 8 ft / Tippet 5X

Art. HMG-FL-FC-1

FLUOROCARBON LEADER

Our Fluorocarbon leaders are soft, castable and made from the 100% pure high premium fluorocarbon material. Designed to refract light just like water, this line is virtually invisible to fish. Less glare and less visible which equates to more fish. Medium to fast sinking. In conjunction with our FC leader floating line will become sinking tip line. Available in two dimension, prelooped with two shorb loops

Art. HMG-FL-FC-2

Hemingway's

Fly Fishing Products

FURLED LEADERS

Our furled leaders formula is a blend of traditional craftsmanship, new technology and more than 20 years experience with the constant quest for improvement. HMG leaders are produced from carefully selected materials. Our choice is double silicone coated nylon for floating leaders and fluorocarbon for sinking leaders.

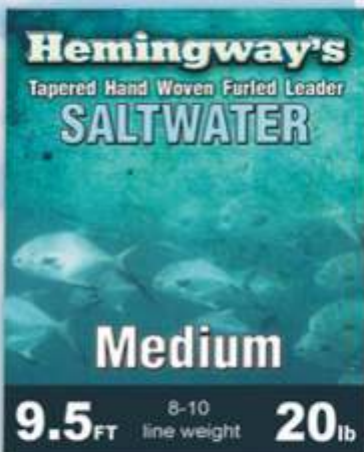

All of our leaders are hand-crafted from over 30-70 m of premium material and are pre-looped to attach to the fly line using the simple loop-to-loop method. This means if the conditions change, or you wish to use a different fishing method, you can switch to another leader in seconds. We have the perfect leader for your fishing. Just add or replace tippet!

**Hemingway's***Fly Fishing Products*

SALTWATER FURLED LEADERS

Our tapered furled leaders for saltwater fly fishing are more aggressively tapered than freshwater leaders. We build these leaders using hard, premium grade double silicone coated monofilament. It is very stiff and helps turning over bulky flies when it is windy... Our material has also a great abrasion resistance and is a must for those who fish coral environments.

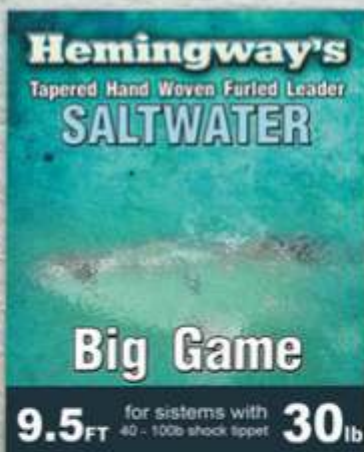

Our leaders are prelooped with two shorb loops for easy connection to mono tippets, class tippet, shock tippets or bite guard tippets.

Art: HMG-FL-SW-M

HMG "MEDIUM" TAPERED FURLED LEADER

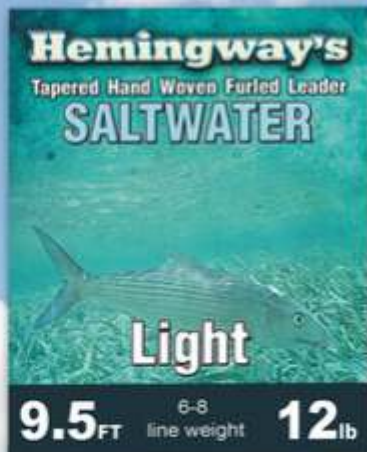

Designed for redfish, snook, striper, bluefish, ladyfish, sea-trout and all other species encountered while inshore fly fishing. Use with 8 to 10-wt rods. Clear color / 9.5 ft / 20 lb

Art: HMG-FL-SW-BG

HMG "BIG GAME" TAPERED FURLED LEADER

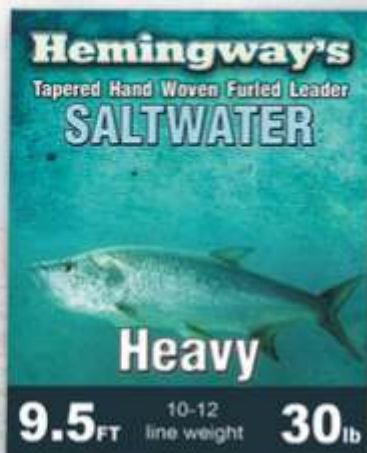

Our strongest, BUT SECTION furled leader for "Big Game" fishing leader systems. For extreme fishing situation with excellent abrasion resistance and shock absorption. Clear color / 9.5 ft / 30 lb

Art: HMG-FL-SW-L

HMG "LIGHT" TAPERED FURLED LEADER

We made this leader to help manage "blow out" winds on bonefish/permit flats. Extreme turnover power, even with weighted bonefish flies and permit crabs. Use with 6 to 8-wt rods. Clear color / 9.5 ft / 30 lb

Art: HMG-FL-SW-H

HMG "LIGHT" TAPERED FURLED LEADER

Ultra strong, abrasion resistance and shock absorption, designed for tarpon, cobia, giant trevally, dorado and big Gulf Coast jacks. Use with 10 to 12-wt rods. Clear color / 9.5 ft / 30 lb

HMG Hand Tied Tarpon Leaders with Fluorocarbon Shock tippet

IGFA Class ultra-hard saltwater mono with 22 inches (0.6 m) between the double biminis. 4 foot overall length.

Complete leader and Haffnagle. Available in three pack of prestraightened leaders: 60 lb (27.3 kg) or 80 lb (36.4 kg) Fluorocarbon shock.

HI-VISIBLE FURLED LEADERS

Hi- visible leaders in three fluorescent colors. Ideal for Fly casting demonstration.

Material: Silk Thread, polyester or nylon

Art: HMG-FL-HV-O

Art: HMG-FL-HV-Y

Art: HMG-FL-HV-G

BIMINI TIPPET

We have taken the Bimini twist knot, and created replacement tippets for furled leaders. The Bimini twist knot offers 100% knot strength, giving you a loop-to-loop connection with no loss of breaking strength. HMG bimini tippet turn over better than other loop knots. Made from high quality nylon or fluorocarbon.

Fly Tying Materials

TUBE BODY

The HMG Tube Body material is ideal for easy and flawless tying of extended fly bodies. It perfectly imitates the true shape and silhouette of an insect, such as mayfly or caddis. With Tube Body you can quickly create flies that are excellent floaters. The Tube Body is hollow, contains air bubbles, making the fly bob on the surface like cork. Tube body is flexible and soft fly body, the spooky fish keeps it !

TUBE BODY - Mayfly

HMG-TB-MF

for tying perfect and hyperrealistic imitations of mayflies on hook sizes 6-18, in many colors and many sizes
Small, medium, large

NEW packaging

Hemingway's
Fly Tying

QUICK DESCENT

Art. HMG-D-QD

An mixture with aluminum metal dubbing that sinks like lead, it'll quickly become a favorite because it dubs so easily.

Colors: Red, Silver, Tan, Green, Insect Green, Pale Gold, Gold, Old Gold, Orange Gold, Copper, Brown, Black

DEER HAIR DUBBING

Art. HMG-D-CN

Excellent, hi-floating mixture with cutted, dyed and curled winter deer hair. For tying nymph thoraxes. Great for dry caddis patterns.

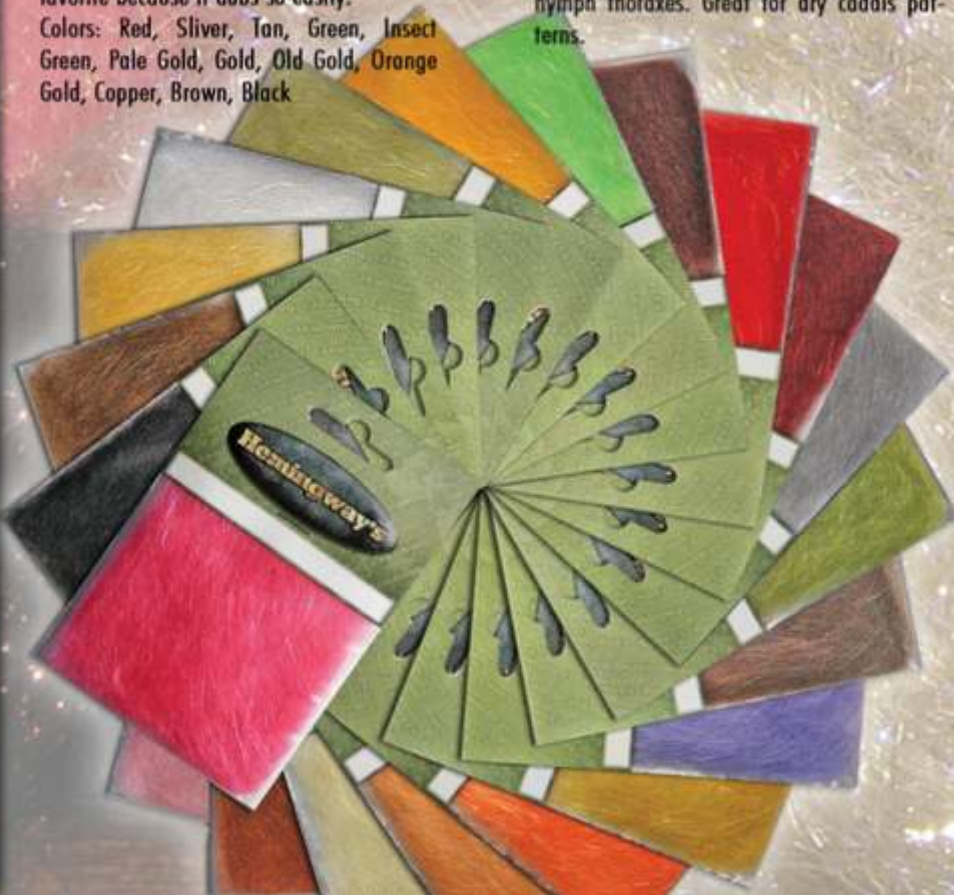

CZECH NYMPHG

Art. HMG-D-CN

Hand-made dubbing blend for the Czech nymphs in 20 popular colors. It consists of rabbit, fine antron, camel hair, and fine pearlescent fibers.

Colors:

01 White, 02 Light Yellow, 03 Golden Yellow, 04 Chartreuse, 05 Cream, 06 Brown, 07 Gold Olive, 08 Olive, 09 Orange, 10 Fluo Pink, 11 Red, 12 Black, 13 Grey, 14 Light Brown, 15 Light Olive, 16 Light Orange, 17 Hot Orange, 18 Light Pink, 19 Purple, 20 Cinnamon

ALL ROUND DUBBING

SYNTHETIC DUBBING is generally constructed of nylon materials and resembles natural dubbing quite closely. This material is an excellent substitute in any nymph pattern calling for natural dubbing, but synthetic dubbing is a top choice for dry fly tyers because of its excellent water resistance capabilities and extremely light weight.

DUBBING COLOR CHART

HARE'S dubbing

Art. HMG-D-HE

Pre-blended 100% rabbit hair. Underfur and guard hairs are blended. This is the most widely used dubbing material. Longer hair makes it easy to dub. Perfect for both dry flies and nymphs. Available colors: Natural, Light Natural, Amber, Black, Brown, Cream, Yellow, Brown Olive, Light Olive, Olive, Tan.

UV dubbing

Excellent dubbing with nice sparkle effect will make your pattern more attractive

Colors: 01 Brown, 02 green, 03 Orange Fox, 04 Light Orange, 05 Brown Olive, 06 Gold Olive, 07 Light Olive, 08 Light Yellow, 09 Gray Brown, 10 Olive, 11 Cream, 12 Pearl

PEACOCK

Art. HMG-D-P

This is great substitution of natural peacock herl. Easy to tie buggly looking and durable "peacock" fly bodies.

Available in 10 colors: 01 Peacock Green, 02 Peacock Bronze, 03 Peacock Eye, 04 Peacock Black, 05 Peacock Red, 06 Peacock Blue, 07 Peacock UV Green, 08 Peacock UV Black, 09 Peacock UV Bronze, 10 Peacock Reddish, 11 Yellow Olive, 12 Pale gold.

HARE'S dubbing plus

Art. HMG-D-HE+

HMG Hare's Ear Plus is a blend of hare's ear, guard hairs, and a small touch of fine sparkling fibres, giving your flies very spiky and translucent appearance. Excellent fur for nymphs, emergers, wets, and streamers. Available in 10 colors: 01-Natural, 02-Natural Dark, 03-Black, 04 Chocolate Brown, 05 Rust, 06 Olive Brown, 07 Olive, 08 Golden, 09 Tan, 10 Olive Green, 11 yellow Olive, 12.Sand.

STARLITE

Art. HMG-D-SL

HMG Starlite is very fine mylar type material. Can be formed into hanks and used for big streamers or cut for dubbing your small flies. Very well with most other materials for dubbing and it doesn't absorb water, so large flies don't get heavier. If you like stuff that sparkles and glitters it just doesn't get any better than this.

Hemingway's

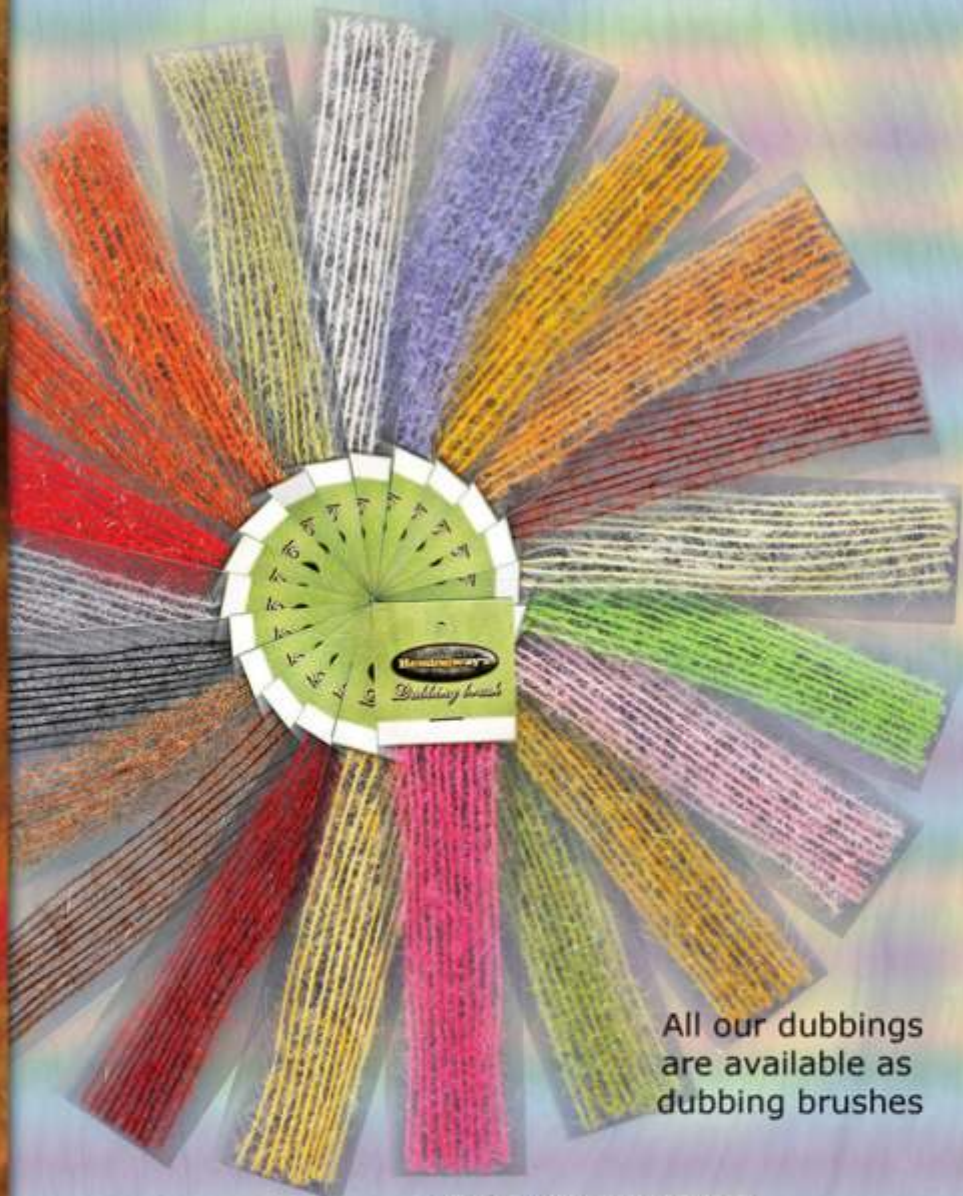

Fly Tying Materials

DUBBING BRUSHES

These Dubbing Brushes are produced with high quality materials and will allow tiers of all skill levels to incorporate them into their patterns.

The standard brush incorporates two ultra-fine copper or stainless steel wires to trap the dubbing. Both versions are very pliable and can be used on almost all dry fly and nymph patterns. They are available in a huge selection of colors and materials such as synthetics and natural hair - squirrel, rabbit, marabou, cdc, deer, and many more. Some are mixed with special synthetics for added flash, while others are made from all natural fibers.

These brushes really make it quick and easy to tie your favorite patterns. If you are frustrated with all the pit falls associated with standard dubbing, give these a try and see what you've been missing.

All our dubbings are available as dubbing brushes

CDC FEATHERS

CDC is an acronym for the French, and somewhat esoteric fly tying term "cul de canard." CDC feathers have been popular in Europe for years and are now finding their way into the North American market. CDC feathers are found near the oil gland of a bird, and accordingly they are also known by more standard terminology as simply "oil gland feathers." These feathers provide a dry fly with superior flotation properties; during the bird's lifetime, these feathers are constantly impregnated with rich oils and become highly resistant to water, ultimately keeping your surface fly where it should be: on top!

HMG FLIES

Hemingway's Fishing Flies are hand tied by fly tyers from Europe. Our fishing flies are subjected to multiple quality checks to ensure that the flies are all top quality products. Only the finest components are used in the construction of our flies, high quality hooks, hackles, tungsten beads, CDC feathers and unique Hemingway's fly tying dubbing, especially our dubbing brushes. The quality of our fly fishing flies is uniform. If you buy a fishing fly today from us, you can be assured that you will get the same quality again, and again and again.....

HMG STREAMERS

Approximately 80% of the time trout are feeding, they are eating underwater rather than taking bugs floating on the surface. Even though dry fly fishing is great fun, sometimes the fish are simply ignoring that manner of feeding.

In order to catch those gorgeous trout one must then switch to nymphs or streamers. HMG Streamers always have the potential of catching huge fish because the larger flies appeal to those desirable bigger fish looking for a substantial meal.

HMG Minnow

HMG-F-57 / size: 6-8

HMG Streamer

HMG-F-60 / size: 6-8
