

Product Guide

Name : Jens Berntsen
Date of birth : 1974
Occupation : Sales Germany
PB Carp : 29 kilo

Why Mainline? I have been using Mainline products for the last couple off years. I started fishing with the Dumbbell Hookers and almost the complete range Hi-Visual pop-ups. Soon after using them successfully I started to use the base mixes as well. The high and consistent quality of the products convinced me to use only Mainline to this day. My favorites baits are The Cell, Fusion und Pulse.

Those baits produced fish from big pits, canals and big rivers for me. In every situation I have 100% confidence in my baits.
Be lucky, Jens

Name : Arjan Braad
Date of birth : 1978

PB : 22.5 kilo NL, 22.5 kilo FR,
19.5 kilo DE

I've been using Mainline Baits for a long time now with great success. It's important to me to be confident in the bait I use and I have that confidence every time. No matter whether it's Cell, New Grange, Activ 8 or any of the other baits in the range, they are all quality baits. Mainline have a high standards in all their baits.

I'm fishing mostly large waters and I love canal-fishing. I always compliment the boilies I'm using with other products in the range including dips, pellets and syrups and of course all the different sizes, shapes and colors of the pop-ups I've caught loads of carp using Mainline products with instant success and long term baiting success. I believe that my catch rate has improved since using Mainline Baits. Yours could too, tight lines

Tight lines, Arjan

Name : Mathieu Baert
Year of birth : 1974
Occupation : EU Sales manager
PB : 20,5 kilo BE,
29,5 kilo FR

As many other continental carpers I am a boilie angler in every way. Boilies in different shapes and sizes have always been my main weapon of choice in targeting big carp. The first Mainline boilie I used was the ever so faithful Activ 8. It meant such a massive improvement to my fishing that I never looked back and since then I have sky high confidence in every bait that comes out of the Mainline stable; with Activ-8, Fusion and Cell being my personal favorites. Fishing short sessions on all different kinds of

lakes at home and abroad means that I need a bait that I can rely on in every situation. Baits with instant attraction, long term pulling power and a perfect digestion in summer as well as in winter. Mainline Baits gives me just that! Moving over to Mainline Baits was a game-changer for me. Take a look and see what Mainline Baits can do for you!

Happy hunting, Mathieu

Pro-Active Shelf life boilies

The Pro-Active range of ready made boilies have been developed utilising the wealth of knowledge and experience, acquired by the Mainline Team over the past 15 years.

This range has been designed to be accepted instantly and has an acceptable nutritional value to fish. Produced using the finest possible ingredients and flavours, all with proven track record.

We have formulated this range of baits to catch fish in all fishing situations and conditions. Have we ever got it wrong?

Available in 500g bags of 18mm

Available in flavours: • **Halibut** • **Tiger Nut** • **Sweet Pineapple** • **Tutti's** • **Tuna**

Pro-Active Bag & Stick Mix

The design of the Bag & Stick mixes is built on Mainlines extensive knowledge & experience in bait formulation.

Incorporating a unique water soluble catalyst system, which capitalises on all aspects of feeding & attraction. Pro-active stick & bag mixes are the ultimate in active particle release and provide a stream of attraction throughout the water column, drawing carp from all levels. Ideally suited for filling PVA sticks and bags, but can also be used as an addition to any Groundbait or spod mix.

1kg bags:

- Crushed Tiger Nut • Crushed Hemp • Cloud9 • Bloodworm stik pellets

Intro Base Mixes

All our products and ingredients are of the highest quality human food grade. Only the finest ingredients are used, they are being shipped from as far afield as Japan, New Zealand and Scandinavia. Everything is packed in the best-laminated foiled bags to ensure that the product remains fresh and top quality at all times. Amino based powdered enhancers and palatants have been added, which not only serve to attract but also give the bait a 'round' taste to complement the initial attraction.

Mainline baits are tailored to be instantly acceptable, but the long life of bait is a vital ingredient of their success. Our mixes are consistently successful throughout a season and even season to season, which is important when you consider the time, money and effort spent on baiting campaigns.

Available in 1kg bags and 10kg buckets.

The New Grange • The Cell • Pulse • Pro-Active Pineapple • The Fusion • Activ Maple-8 • Activ-8 Liver & Marine • Essential Fish • Essential Opal • High Leakage 50/50

The New Grange

Probably the most complete carp food ever made.

Underneath the unique savoury taste and active profile is a bait that provides the carp with their entire dietary requirements. Utilising our exclusive protein source ingredients and the triggers that made the original grange so outstanding we truly believe we have created a new 'Super-bait' set to take the angling world by storm. The New Grange is designed to not only stimulate, but to sustain, the feeding responses of carp in all water temperatures. To be used with the New Grange Activator

The Cell

A TOTALLY NEW CONCEPT IN BAIT FORMULATION. The Cell is a completely different type of bait to everything that has gone before it.

The Cell is not a milk protein, fishmeal or bird-food based bait, it is the next step in nutrition technology. It is designed to provide a protein source that is easier for carp to convert than fishmeals and bird-foods, provoking a sustained feeding response in all water temperatures. To be used with the Cell Activator.

Pulse

The Pulse is a food source bait which uses a reactionary liquid additive to 'energise' the complex recipe structure. The most striking aspect of the Pulse is its smell which is unlike anything else we have come across before! A uniquely 'carpy' aroma that is pungent and distinctly unusual. The Pulse is reddish brown in colour, packed with active Amino acids with a high protein profile, extremely digestible and suitable for all year round usage. To be used with Pulse Activator.

Pro-Active Pineapple

The Pro-Active Pineapple was released after the phenomenal success of the High-Visual pineapple pop-ups. We were constantly asked to produce a food source, pineapple bait. Protein, digestion, solubility and taste are the key factors to the makeup of this bait. Natural in colour with a sweet, creamy, pineapple taste and smell. To be used with the Pro Active Pineapple Activator.

The Fusion

This is without doubt the most complex H.N.V style bait we have developed to date. The combination of two reactionary components, one dry and one liquid, insure easy access to the nutritional and energy aspects of this product and ensure its effectiveness time and time again. A fishy-meaty-savoury aroma and low in oil content, reddish brown in colour. To be used with the Fuze Activator.

Activ Maple-8

Although the name suggests it, this is not just Activ-8 with the inclusion of maple, far from it; the complexity and make up of this particular product incorporates a high natural sugar content which in turn makes this highly convertible into useable energy. To be used with the Active Maple-8 Activator.

Activ-8

It is neither a fishmeal, bird food or milk protein mix, but contains eight active ingredients, some of which we believe have not before been used in carp baits. This is a superb all year round bait, being nutritional but easily digested. To be used with the Activator.

Liver & Marine

A unique blend of the finest fish-meals with added high fat energy sources and enriched with vitamins and minerals. It contains the best liver and amino compounds available and they help give the bait a different smell and taste. This was designed to be used on fishmeal dominated waters and be instantly attractive while retaining a significant-ly different smell and taste for that added edge.

Essential Fish

Using attractors from both the Essential Opal and Liver and Marine Baits, the Essential Fish Mix is a fishmeal different to any others. It contains the powdered feed inducing agents, palatants and the fruity edge of the Opal, making it a great bait even without added flavours. Alternatively the Profile Plus flavours or liquid additives can be used to enhance the smell and taste of the base mix.

Essential Opal

Based on various bird-feeds, milk proteins, high energy sources and water soluble fats, this really is a bird-food bait with a difference. It

has a strong, fruity flavour in the actual base mix giving the bait the ability to overcome what are generally termed 'bottom' smells such as weed and in particular silt. It can be used with any flavours or additives in the Mainline range, and although aimed at the longer-term use, it will invariably catch from its first introduction due to its unique and remarkable smell.

High Leakage 50/50

One of the most popular and cost effective base mixes, comprising a blend of carbohydrates and proteins. As the name suggests it has an extremely high leakage rate, balanced with a neutral flavour and a taste. As it has no real 'handle' of its own, it is best used with a combination of the liquid amino based additives, flavours and sweeteners.

Polaris pop up mix

Polaris has been specially designed to take all of the hard work out of making the perfect pop-up's. Simply mix eggs and your chosen attractor and then add the Polaris straight from the tub. Once rolled, boiled and left to dry you will have the perfect pop-ups every time. One large egg makes on average 100 14 mm pop-ups with no need to microwave or bake.

Base Mix Additives

These are supplied in 300ml bottles and they are a necessary part of the formulation of the Mainline base mixes. They should be used at an inclusion rate of 15ml per 500gr of the corresponding base mix. They are not designed to be used with non dedicated base mixes. They are high in attraction and liquid food source and contain the liquid triggers needed to initiate the chain reaction to 'kick start' the Mainline base mix into action.

300ml bottles are available in

- **New Grange** • **Cell** • **Pulse** • **Pro Active Pineapple** • **Active maple-8** • **The Fuze (Fusion)**
- **Activ-8** • **Multi Stim**

Oils

Fosoil is a fish feed inducing oil, originally designed for the fish farming industry as a feed inducing coating for pelleted foods; it is suited to any of the fishmeal base mixes in the range at 5ml per egg.

Hempseed Oil is one of the best natural attractors for carp. Available in its extracted form Concentrated Hempseed Oil is perfect for coating/glugging your boilies, particles, pellets, and enhancing ground-baits & method mixes.

Profile Plus Flavours

A range of very concentrated flavours, only marketed by Mainline. These truly are the Rolls Royce of flavours, and give the most accurate, lingering smell we could find. Although higher priced, a little of the flavour goes a long way because of their strength, and for a concentrated flavour there is no easily detectable solvent base. They are a highly soluble range of flavours in all water temperatures and are a perfect match for any of our base mixes at any time of year.

60ml bottles available in:

- **Pineapple Juice** • **Raspberry Ripple** • **Juicy Fruit** • **Fruit-Tella** • **Sweet Plum** • **Strawberry Jam**
- **Condensed Milk** • **Tiger Nut** • **Crayfish** • **Big Crab** • **Red Lobster**

Response Flavours

A comprehensive range of flavours, from fish to fruit or spice to savoury there is an attractor for every situation.

Generally, the bulk of flavours available today, use small amount of actual flavour on a high level of solvent base such as Ethyl Alcohol or Glycerol.

These bulk solvents are the base of most flavours, but carp, such as their awareness, can easily recognise the commonly used bases. Having a variety of both flavour and base options, such as in the Response Range gives the angler two variables to prevent using common combinations and spooking wary carp.

60ml bottles available in:

- **Tangerine Juice** • **Cherry Juice** • **Strawberry Zest** • **Tutti Frutti** • **Pineapple** • **Blackcurrant**
- **Banana & Pear** • **Scopex** • **Spice B** • **Milky Toffee** • **Salmon & Shrimp** • **Mediterranean Shellfish**

To compliment the Response Range we have the ideal sweetener in **Hydra Sweet**, which rounds off the taste of any bait.

Response Flavours	Banana & Pear	60 ml	M17012
Response Flavours	Hydra Sweet (Sweetener)	60 ml	M17013

The Activ-Ades are feed inducing flavours containing a combination of amino based attractors, taste enhancers and palatants. Imported from the United States they are used in the animal feed industry as feed inducing or triggering agents for the chemical receptors of hunger. The whole range is very water soluble, giving a very good leakage rate which in turn triggers quicker feeding responses from the carp. The Sweet-Ade is designed as the ultimate sweetener, but is still on the same base as the rest of the range.

100ml bottles available in:

- **Activ-Maple-Ade** • **Activ-Strawberry Ade** • **Activ-Peach-Ade**
- **Activ-Pacific Tuna-Ade** • **Activ-Trigger-Ade** • **Activ-Sweet-Ade**

Active Ade Particle & Pellet Syrups

Pro-Activ Particle & Pellet Syrups have been specifically formulated to draw fish into the baited area and induce a competitive feeding response. The thick, syrupy liquid is designed to be denser than water, dispersing as it reaches the bottom and spreading in a highly attractive cloud.

Pro-Activ Particle & Pellet Syrup contains liquid palatants, aminos and natural sugars all of which are highly effective and well proven feeding stimulants. The Syrup is convenient, easy to use and completely water soluble. Designed to boost the attraction of prepared particles or pellets and to be a highly effective ground-bait additive. Suitable for Carp Tench Bream and Roach.

Recommended dosage is 10 ml per 1kg, but the natural attractors used make it impossible to overdose. 500ml bottles are available in:

- **New Grange** • **Activ-8** • **Active Maple-8** • **Pineapple Juice** • **Condensed Coconut Milk** • **Halibut**
- **Tiger Nut**

Active Ade Particle and Pellet Syrup	Tiger Nut	500 ml	M09006
Active Ade Particle and Pellet Syrup	New Grange	500 ml	M09007

High Impact Groundbait

These ground-baits contain high quality food ingredients and will sustain rather just stimulate a feeding response. They can be used for carpet feed, method fishing, carriers for particles and pellets and as an added extra for stick mixes. The resulting mix is highly attractive and extremely effective, giving rapid dispersion of attractors into the water column.

2kg buckets available in:

- **Activated Nut Mix** • **Activated Fish Mix**
- **Activated Pineapple Mix** • **Activated Hemp Mix** • **Activated Indian Spice Mix**
